Art Unit: 2833

1. The substitute drawing sheets, submitted January 18, 2005 are appreciated. However, these drawings are objected to because there are many reference lines in Figs. 2-4, 9, 14, 19, 28 and 30 that lack reference numerals. It appears that most of these lines should be deleted.

2. The substitute specification submitted January 18, 2005 is appreciated and has been entered. However, the disclosure remains objected to because of the following informalities:

- On line 20 of page 1, it appears that “of” should be changed to –to- since the additions are being made *to* the original.
- Possessives are misused throughout the specification (see page 2, lines 7 and 12, for example).
- The comma should be removed from line 27 of page 2.
- On line 13 of page 5, it appears that “as” should be removed.
- It is unclear how a portion of a circuit diagram can show the “capability” of something, as suggested on lines 18+ of page 5.
- On line 7 of page 8, it appears that “is a description” should be changed to –are an arrangement-, or something similar.
- On line 14 of page 8, it appears that “and are of screw type” should be changed to –are of the screw type-.

Applicant is kindly requested to proofread the application. Appropriate corrections are required.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2833

4. Claims 6-9 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Borland, et al. This system for monitoring circuits comprises a trailer connector 33 for connecting to a hauling vehicle trailer wiring 37. The connector has current sensors (see column 6, lines 18-220 disposed within a housing (see column 5, lines 12-15). In addition, the system comprises a monitor 21 with LEDs 24-26 each having a resistor 76-78. In regard to claim 8, Borland teaches the use of a variable resistor so that the "driver can adjust the monitoring circuit" to operate with each trailer.

5. Claims 10-14 are allowed. The prior art fails to show or teach a monitor, as claimed, mounted on a part of the trailer.

6. Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. It is suggested that responses to this final action be faxed to:
(703) 872-9306

Please refrain from sending a confirmation copy, as noted in 37 CFR 1.6(d) and 1.8(b).

Alternatively, responses may be mailed to:
